

Your auditors, fully used. Every rule, provable. A pilot you can measure.

ScheduleAI plans audits and inspections for certification, inspection and accreditation bodies. It checks every competence, rotation and impartiality rule, fills internal capacity before subcontractors, and nothing is confirmed until a planner approves it.

12 min

to schedule 49,000
audit-hours for 800
auditors in 12 countries

Global certification body,
measured on its own production
data

Before: ~~about a month~~ by hand

THE BUSINESS CASE, WORKED THROUGH

What a mid-sized certification body could gain in a year

Subcontracted days moved in-house		£210,600
Rescheduling handled for you		£32,577
Planning time freed		£28,227
Travel costs		£12,074

Estimated annual value

£283,479

Expected scenario, before licence
Range £160k to £422k across scenarios

Illustrative example calculated with the ScheduleAI savings calculator. Days moved in-house are capped by the spare capacity your auditors really have. Run your own numbers at checkfirst.ai/calculator.

THE EXAMPLE

Internal auditors	30
Audit days a year	6,000
Subcontracted	30% at £650 a day
Planners	3 (60% on scheduling)
Country	United Kingdom

AND FOR YOUR PEOPLE

42 wk	of repetitive scheduling work taken off planners each year
55 h	less time on the road per auditor each year
180	short-notice reschedules a year handled with ready options

MEASURED ON CUSTOMERS' OWN PRODUCTION DATA

59% → 73%

Internal share of work
European certification body

74% → 85%

Auditor utilisation
Compliance and risk company

28%

Less subcontracting
International certification & inspection body

2 wk → 30 min

Allocation time each month
Compliance and risk company

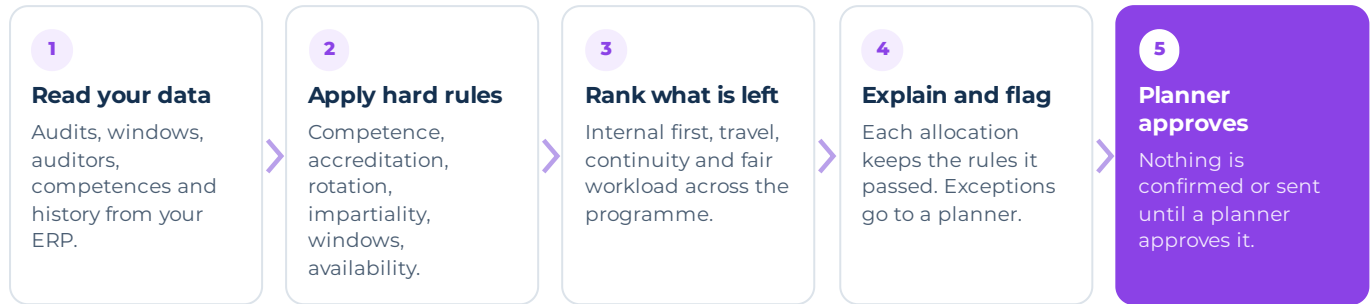

I'm speechless. What you can do in twelve minutes normally takes us a month.

Managing Director • global certification body

HOW THE ENGINE WORKS

Hard rules first. Then the best plan. Every decision explained.

QUESTIONS YOUR BOARD WILL ASK

Who is accountable for each allocation?

Your planners. ScheduleAI proposes, a planner approves the plan as a whole run or item by item, and every decision is logged with the rule that allowed it.

Will it stand up to our accreditation body?

Competence, rotation and impartiality are checked on every allocation, and the record exports for your own files and for assessors.

Does it replace our ERP or certification platform?

No. It connects through a REST API and webhooks, with a pre-built Intact integration and Outlook calendar sync, and writes the result back.

Is our data safe?

ISO/IEC 27001 certified, GDPR compliant and hosted in AWS Ireland. Independent penetration test, most recent May 2026. Customer data is never used to train models.

How is it priced?

An annual licence per scheduled day plus a platform fee, with unlimited rescheduling. The custom demo is free and scoping is a fixed fee agreed in writing.

A PILOT YOU CAN MEASURE

WEEKS 1-2 • FREE**Custom demo**

A month of your own audits planned and compared with your real plan, audit by audit.

WEEKS 3-6 • FIXED FEE**Scoping and integration**

Rules, data and connections configured with your team.

WEEKS 7-14 • ONE DIVISION**Pilot**

The licence starts. Results are measured against the baseline before any roll-out.

THEN**Roll-out**

Further divisions and countries on the same rules.

Success measures agreed in writing, for example share placed automatically, internal share of work, travel per audit or planning hours, with a baseline from your own data.

Used by UKAS, AENOR and DQS

Accreditation and certification bodies in Europe

Largest measured run

2,124 audits for 800 auditors in 12 countries

Built for TIC

ISO/IEC 17021-1, 17065, 17020 and 17011 rules held as rules

Checkfirst, London

Founded 2021, backed by Notion Capital and others

YOUR NEXT STEP

Put a month of your own audits through it.

A 30-minute call, then a free two-week custom demo on your own data. No licence until you have seen it work.
